Fillers, Panels, and Trim Planner

Plan finishing pieces with your designer or installer. Required sizes and installation methods depend on the cabinet line and room.

Customer / project: _____

Review the layout

- [ ] Identify fillers beside walls and at required clearances.
- [ ] Check door, drawer, and handle operation.
- [ ] Identify exposed cabinet sides and panel requirements.
- [ ] Plan island or peninsula backs and ends.
- [ ] Include panel thicknesses in layout dimensions.

Review finishing components

- [ ] Confirm toe-kick material and required lengths.
- [ ] Coordinate crown molding with cabinet and ceiling heights.
- [ ] Plan scribe, light rail, and other trim where needed.
- [ ] Confirm finish, quantity, item number, and intended location.
- [ ] Assign cutting, scribing, attachment, and edge finishing.
- [ ] Coordinate countertop support separately from decorative panels.
